Version: 2 Date: 17 September 2004

Reviewer's report:

General

Excellent revision.

-----------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

The authors did a good job responding to earlier concerns. The supplementary tables comparing non-responders to responders is very helpful.

-----------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

The paper is now nicely clarified where needed.

-----------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision
