Reviewer's report

Title: The Influence of Objectives, Learning Experiences and Examination Blueprint on Medical Students' Examination Preparation

Version: 2 Date: 20 July 2005

Reviewer: Cam Enarson

Reviewer's report:

General

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

None

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

None

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

The number of total preceptors was included - 32 but no comment was made that if the non-responders were added to those respondents who noted they were unaware of the course objectives (3/19) then half of the preceptors could have been unaware of the objectives. The authors may want comment on this.

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No

Declaration of competing interests:
