Reviewer's report

Title: Comparative survey of Complementary and Alternative Medicine (CAM) attitudes and use and resource-seeking behavior amongst medical students, residents & faculty

Version: 2 Date: 14 August 2006

Reviewer: Victoria Maizes

Reviewer's report:

General
This article contributes to our understanding of the attitudes of medical students, interns, and faculty toward Complementary and Alternative Medicine. Its longitudinal reassessment demonstrated maintenance of positive attitudes over the course of medical school - a new finding. Similarly the interns positive attitudes towards CAM despite varying exposures in medical school may reflect a change in the overall medical cultural attitude towards CAM.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

----------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
Page 7 lists statistical analyses used for between group comparisons - yet these do not show up anywhere else in the paper. Please discuss their use.

----------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

----------------------------------------------------------------------------------------

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
