Reviewer’s report

Title: Medical student and academic staff perceptions of role models: an analytical cross-sectional study

Version: 3 Date: 23 December 2005

Reviewer: Kristi Ferguson

Reviewer’s report:

General
The authors have responded to recommendations in a satisfactory manner. Even though I disagree with the inclusion of Figure 1, since none of the correlations is statistically significant, the reader can make that judgment for himself or herself.

------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

------------------------------------------------------------------------------------------------------------------

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No

Declaration of competing interests:
