Reviewer's report

Title: Perceptions on the Importance of Gerontological Education by Teachers and Students of Undergraduate Health Sciences: An Exploratory Study

Version: 2 Date: 16 November 2006
Reviewer: Hollis Day

Reviewer's report:

General:
Overall significant improvement from original work.

---------------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

---------------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
I would move the description of the participants to the results rather than methods section
Please proof read carefully. There are spelling mistakes ( filed instead of field for example) and punctuation errors. The use of the term " on the other hand" so consistently is also distracting.

---------------------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No

Declaration of competing interests:
No competing interests
