Reviewer's report

Title: Evaluation of a learner-designed course for teaching health research skills in Ghana

Version: 3 Date: 9 May 2007

Reviewer: Cindy L Lam

Reviewer's report:

General

The second revised paper has addressed all the points raised from the previous submissions. I enjoy reading the paper and I believe it will make a useful reference on course design and evaluation to other medical educators. I think the paper is ready for publication without the need of any further revision.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
