Reviewer's report

Title: Interactive Content for the iPod - its Production, Design and Potential Use: Technical Advances

Version: 1 Date: 14 May 2007

Reviewer: Sharon E Dennis

Reviewer's report:

General

This is an innovative use of case-based teaching. The paper is well written and well thought out. The technical coding descriptions are helpful and could be used by others to try a similar case-building system. The results of the student survey provide interesting data on student attitudes towards interactive learning using new technologies. The conclusions reached are appropriate and add to the body of knowledge in this field.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

None.

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Vodcast is also commonly called video podcast.

On my print-out of the PDF, Figures 1, 3, 4, 6, and 7 are too small to be readable or show useful information. This may just be my print-out, but the figures should be enlarged to be sure they are readable.

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
