Reviewer’s report

Title: Burnout and psychiatric morbidity among medical students entering clinical training: a three year prospective questionnaire and interview-based study

Version: 2 Date: 6 March 2007

Reviewer: Olaf Gjerl?w Aasland

Reviewer’s report:

General
The article has improved in clarity and is now even more interesting.

The question of psychological assessments before entering medical school remains, as far as I can see, still unaddressed. But the article certainly leads up to such a discussion.
