Reviewer's report

Title: A Virtual Computer Lab for Distant Biomedical Technology Education

Version: 2 Date: 3 January 2008

Reviewer: Vernon Curran

Reviewer's report:

Well written paper and an interesting 'case discussion' of the use of videoconferencing and desktop sharing software to deliver a distance learning course on biomedical technology. What are the main implications of the project's findings for the field of distance learning or delivery of computer lab training? What future research might be needed to advance the field of distance learning and computer lab training which relate to the distance learning model described in your paper? How does your paper advance scientific knowledge in the distance learning field?

What next?: Unable to decide on acceptance or rejection until the authors have responded to the major compulsory revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
