Reviewer’s report

Title: Factors affecting medical students in formulating their specialty preferences in Jordan

Version: 2 Date: 11 March 2008

Reviewer: Doug Campos-Outcalt

Reviewer’s report:

The authors have addressed the issues raised in the first review and the manuscript is now suitable for publication.

There are a few instances in the manuscript where the authors still use the term specialty choice rather than specialty preference. But that is a minor issue at this point.

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
