Reviewer's report

**Title:** An educational game for teaching clinical practice guidelines to Internal Medicine residents: development, feasibility and acceptability

**Version:** 2  **Date:** 13 September 2008

**Reviewer:** Jyothis George

**Reviewer's report:**

"Theoretically, the competitive nature of the Guide-O-Game© may also 'incite' residents to learn....." Perhaps a better word needs to be chosen instead of 'incite'

In the conclusions section the authors say "We are currently planning for a controlled trial to investigate the effect of the Guide-O-Game© on residents’ knowledge of clinical practice guidelines." This is not a conclusion of the study and should therefore be removed from this section. It could well be incorporated into the discussion.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**
