Reviewer’s report

Title: Relationship of Creative Projects in Anatomy to Medical Student Professionalism, Test Performance and Stress: An Exploratory Study

Version: 1  Date: 27 August 2009

Reviewer: Inam Haq

Reviewer’s report:

This is a good paper that I do not think really needs the quantitative data trying to relate the creative activity to exam scores. It is also worth the authors reflecting on the female preponderance in volunteers, and how to engage men in this worthwhile activity! Also worth stating whether these students will be followed up later in their course.

Otherwise a paper that should be published

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
