Reviewer's report

Title: How old are you? Newborn gestational age discriminates neonatal resuscitation practices in the Italian debate.

Version: 1 Date: 14 August 2009

Reviewer: Vincenzo Zanardo

Reviewer's report:

Turillazzi et al. address an important problem of interest to a broad biomedical audience.

The piece is well referenced and written well enough for publication.

- Major Compulsory Revisions (which the author must respond to before a decision on publication can be reached): religious reasons, very significant in Italian culture, need mention.
