Title: Is informed consent related to success in exercise and diet intervention as evaluated at 12 months? DR’s EXTRA study

Version: 4 Date: 3 May 2010

Reviewer: Charlie Goldsmith

Reviewer’s report:

The authors have done a reasonable job of dealing with the issues raised by the reviewers. This reviewer would raise one more issue on page 10 paragraph 1 line 4:

1. Suggest the word should be “percent” rather than “percentages” to read “Four percent felt that their health was extremely good…”

Level of interest: An article of limited interest

Quality of written English: Acceptable
