Reviewer’s report

**Title:** Perspectives on the ethical concerns and justifications of the 2006 Centers for Disease Control and Prevention HIV testing recommendations

**Version:** 1  **Date:** 3 November 2011

**Reviewer:** Eduardo Rodriguez

**Reviewer’s report:**

Discretionary revisions:

The article may be improved by stating clearly the limitations of the work, since the rationale given by the conflicting answers reported are derived from different visions on the social problem of HIV testing.

It would be helpful that the authors themselves give some recommendations in the conclusion to guide the way to proceed with present HIV testing recommendations and for future changes to improve the system.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**
