Reviewer's report

Title: Patients' perceived purpose of clinical informed consent: Mill's individual autonomy model is preferred

Version: 2 Date: 8 June 2013

Reviewer: Andrew Carson-Stevens

Reviewer's report:

The authors have addressed all my initial major concerns.

Support is still needed to assist the authors with improvement of the quality of written English prior to publication.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:

I declare that I have no competing interests.
