Reviewer's report

Title: Ethical issues relating to pre-diabetic living donor kidney transplantation

Version: 2  Date: 26 January 2014

Reviewer: Heiner Wolters

Reviewer's report:

This paper is of high interest for the transplant community in the world and especially in Mexico. Although living donation is a perfect possibility to avoid dialysis it is important to show that no end-stage-renal Patient has to die if no donor is available. So if any risk exist for a potential donor the donation must not be performed. This paper is important to make this clear.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
