Reviewer’s report

**Title:** Ethical issues in the Export, Storage and Reuse of Human Biological Samples in biomedical research: perspectives of key stakeholders in Ghana and Kenya.

**Version:** 2  
**Date:** 15 September 2014

**Reviewer:** Janet Seeley

**Reviewer's report:**

This is a well written and interesting paper.

No major compulsory revisions.

Minor revision -- I am curious that the gender, age and position of the respondents is not mentioned. I would suggest the gender and age of the respondent is added after each quote. It may be that there is no difference between what men and women said, or what people at different positions in the research process said -- but it would be useful to reflect on this in this paper.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I know the authors of this paper but I declare that I have no financial or non-financial competing interests in relation to this paper.
