Reviewer's report

Title: Ethical challenges in surgery as narrated by practicing surgeons

Version: 2 Date: 15 February 2005

Reviewer: Donna M. Romyn

Reviewer's report:

I have reviewed the revised version of this manuscript and feel that the authors have adequately addressed the concerns identified in my initial review. My only recommendation at this point would be that the authors delete the sentence beginning 'The interviewees' meaning is in focus if ...', given that it does not seem to be relevant (i.e., does not apply in this analysis).

I wish the authors well as they work toward completing the remainder of this interesting and important study.
