Reviewer's report

Title: Ethicolegal education based on a survey of postgraduate clinical trainees in Japan

Version: 5 Date: 8 April 2005

Reviewer: grant gillett

Reviewer's report:

The manuscript needs to be revised in conjunction with a medical ethicist who is fluent in English before it actually has anything to teach us. It ought to be because a lot of work has goner into it even though the lecture concerned is working on the basis of a very narrow conception of what medical ethics is about.
