Reviewer’s report

Title: Termination of pregnancy in thalassemia major, hemophilia and Downas syndrome; what Iranian Physicians think?

Version: 3 Date: 22 September 2008

Reviewer: Jenny Hewison

Reviewer’s report:

Minor essential revisions:
1. There are 323 participants. It follows that there cannot be 680 physicians agreeing with abortion for all three conditions, as reported in both the results section and the abstract. The figures relating to gestation must also be wrong.
2. The English is much better, but further editing is still required.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
