Reviewer's report

Title: The Tinnitus Research Initiative (TRI) database: A new approach for delineation of tinnitus subtypes and generation of predictors for treatment outcome

Version: 3 Date: 15 July 2010

Reviewer: Gerhard Andersson

Reviewer's report:

The manuscript has now been improved and I appreciate the response given by the authors. The initiative of developing a database for tinnitus treatment research is important and I hope this will help researchers in the future to develop standards for treatment evaluations.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
