Reviewer's report

Title: Has information technology finally been adopted in intensive care units? A survey and review of the literature.

Version: 2 Date: 17 May 2010

Reviewer: Paul G Shekelle

Reviewer's report:

This is a paper I reviewed previously, that describes the uptake of HIT in ICUs in Flanders. It has been responsive to prior comments, and I have no additional comments, other than it will still benefit from some additional editing. I suspect the discussion can be substantially shortened.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests
