Reviewer's report

Title: A scenario analysis of the future residential requirements for people with mental health problems in Eindhoven

Version: 1 Date: 4 November 2010

Reviewer: Paul Goodwin

Reviewer's report:

I am happy that all of the issues that I raised in relation to the first version of this paper have been resolved. This new version is much clearer in its discussion of the application of scenario planning. It provides an interesting and useful account of the role of the technique in an area where it has rarely, if ever, been used.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
