Reviewer’s report

Title: Development of a context model to prioritize drug safety alerts in CPOE systems

Version: 3 Date: 18 April 2011

Reviewer: Andrew Georgiou

Reviewer’s report:

Minor essential revisions:

Page 3: The section on Relevant information ends with a sentence that is not grammatical.

Page 6: Second paragraph, last sentence: What does the word “evolute” mean? Is it: “a curve which is the locus of the centres of curvature of another curve” as defined by the Oxford Dictionary? Or perhaps it means rolled outwards at the edges (Botanical term)? Is it meant to have something to do with the word “evolve”? Please clarify and simplify.

Page 9: The second paragraph (last sentence) is grammatically sloppy. Please amend.

Page 10: What is NCC MERP? The reader should not have to look up the References to find out.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
