Title: Text data extraction for a prospective, research-focused data mart: implementation and validation

Version: 2 Date: 26 July 2012

Reviewer: Rebecca Crowley

Reviewer's report:

The authors have addressed the concerns from the previous draft. I am not confident that this should be published as a research paper. A technical description, or case study might be a better article type for this manuscript.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
