Reviewer’s report

Title: Adaptation of a web-based, open source electronic medical record system platform to support a large study of tuberculosis epidemiology

Version: 1 Date: 6 June 2012

Reviewer: Ann Marie Kimball

Reviewer’s report:

Major Compulsory Revisions: none
Minor Essential Revisions:
The manuscript represents a valuable "how to" contribution in tailoring systems based on open MRS to special studies such as TB epidemiology. It will benefit greatly if the authors can share more of their evaluation criteria for success in the work they have done.

Minor essential revisions
I did not find many such errors in the text provided

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
