Title: Assessing Accuracy of an Electronic Provincial Medication Repository

Version: 2 Date: 11 April 2012

Reviewer: Lars Henning Pedersen

Reviewer’s report:

The authors have changed the paper according to the previous comments.

The paper describes the strength and limitations of a specific electronic medication dispensing record. Yet, the results are important also for other systems and countries and the paper provides new insight, scientifically as well as for policy making.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
