Reviewer's report

**Title:** Detecting Causality from Online Psychiatric Texts Using Inter-Sentential Language Patterns

**Version:** 4  **Date:** 15 June 2012

**Reviewer:** Rutu Mulkar-Mehta

**Reviewer's report:**

Thank you for your comments and changes made to the manuscript.

There is only one nit pick I have, which is with the references not organized in alphabetical order. Apart from that the paper and presentation looks much more solid.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** Yes, and I have assessed the statistics in my report.
