Reviewer’s report

Title: Integrating the results of user research into medical device development: insights from a case study

Version: 3 Date: 24 February 2012

Reviewer: Patricia Grocott

Reviewer’s report:

The recommendation is for publication with correction of the typographical error. In addition on P 17 second paragraph, the authors state towards the end of the paragraph that ‘there seemed to be consensus about the place of user needs research vis-à-vis the technology and thus no contingencies in relation to user needs work were identified’. This sentence is somewhat opaque and I think the argument could be strengthened by being more direct.

Level of interest: An exceptional article

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare I have no competing interest.
