Reviewer's report

Title: National survey focusing on the crucial information needs of intensive care charge nurses and intensivists: same goal, different demands

Version: 2 Date: 7 November 2011

Reviewer: Anne Miller

Reviewer's report:

there are multiple minor essential revisions needed that amount to a significant and major revision. However, I do believe that the investment of time to clarify the issues raised will substantially improve the paper. I also believe that the substance of the paper is important and could be important to a broad audience but that currently this is lost through lack of explicit research questions and considerable confusion in the method section

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
