Reviewer’s report

Title: National survey focusing on the crucial information needs of intensive care charge nurses and intensivists: same goal, different demands

Version: 4 Date: 28 February 2012

Reviewer: kirsten colpaert

Reviewer’s report:

Major Compulsory Revisions
Readability should be improved by substantial shortening of the manuscript. There is important overlap between methods and results. Table 1 has not been improved, and still no legend included. Data in table 1 is repeated in result section, this should be corrected. Table 2 is difficult to understand. Although the title seems appealing, the manuscript is so overloaded that it is very difficult to stay alert.

Level of interest: An article of limited interest

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: No, the manuscript does not need to be seen by a statistician.
