Title: A Study of General Practitioners' Perspectives on Electronic Information Management Systems in NHS Scotland. Mixed-Methods Analysis of Barriers and Facilitators

Version: 2 Date: 14 April 2013

Reviewer: Jim Warren

Reviewer's report:

I am satisfied that my comments and concerns from the previous report have been adequately addressed. I believe this manuscript should proceed to publication. The article provides detailed insight on the phenomenon of GP computing. It is of international relevance as many nations catch up to UK levels of primary care computerisation.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
