Reviewer’s report

Title: Using Latent Class Analysis to Model Prescription Medications in the Measurement of Falling Among a Community Elderly Population

Version: 4 Date: 6 May 2013

Reviewer: davide D sisti

Reviewer’s report:

The authors have responded satisfactorily to questions and improved the text. However, authors must still move the correspondence analysis (CA) in the materials and methods section.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
