Reviewer’s report

Title: A cross-sectional pilot study assessing needs and attitudes to implementation of Information and Communication Technology for rational use of medicines among healthcare staff in rural Tanzania

Version: 3 Date: 27 June 2014

Reviewer: Mia van der Kop

Reviewer’s report:

The authors have thoroughly and appropriately addressed the concerns I had raised during my review.

Please note that many of the revisions made require editing e.g. question should be questions; give should be gee; needs should be need etc...

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
