Reviewer’s report

Title: A Draft Framework for Measuring Progress towards the Development of a National Healthcare Information Infrastructure

Version: 3 Date: 5 May 2005

Reviewer: William Yasnoff

Reviewer’s report:

This revision is greatly improved, and the authors have responded satisfactorily to most of the suggested revisions. However, one minor but essential concern remains:

The manuscript interchanges the words health and health care when referring to the NHII (including in the title). This should be consistently changed to health (i.e. National Health Information Infrastructure) as the term health care is too limiting and overemphasizes the initial steps of the NHII as opposed to the later uses and ultimate goal.

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable
