Reviewer's report

Title: PHSkb: A Knowledgebase to Support Notifiable Disease Surveillance

Version: 3 Date: 16 July 2005

Reviewer: Omar Khan

Reviewer's report:

General

A useful idea for information sharing. As the authors point out, field testing is necessary to demonstrate the actual utility of the tool.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

I concur with the previous reviews having taken place and the subsequent revisions.

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No

Declaration of competing interests:
