Title: Development and Initial Testing of a Computer-Based Patient Decision Aid to Promote Colorectal Cancer Screening for Primary Care Practice

Version: 3 Date: 11 October 2005

Reviewer: Mary Ann O'Brien

Reviewer's report:

General
Thank you for asking me to re-review this manuscript. The authors have addressed all my comments except for readability.

----------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

----------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

The authors have clarified that there is an audio component, which helps to make the content accessible to users with varying levels of literacy. However, the authors should state whether or not readability was formally assessed during the usability testing. If readability has not been assessed then the authors are encouraged to do so as they proceed with the development of the aid.

----------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
