Reviewer's report

Title: A simple statistical model for prediction of acute coronary syndrome in chest pain patients in the emergency department

Version: 2 Date: 5 February 2006

Reviewer: Anne-Maree Kelly

Reviewer's report:

General

I am not satisfied that the science of this work meets acceptable standards.

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

-------------------------------------------------------------------------------

What next?: Reject because scientifically unsound

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No
