Reviewer’s report

Title: A simple statistical model for prediction of acute coronary syndrome in chest pain patients in the emergency department

Version: 2 Date: 24 April 2006

Reviewer: Gil L'Italien

Reviewer’s report:

General

----------------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

----------------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)
