Reviewer's report

Title: Systematic review of prognostic models in traumatic brain injury

Version: 3 Date: 30 October 2006

Reviewer: Alan Tennant

Reviewer's report:

General
In the event, the paper is much improved, and has answered most of the issues in my first review. I think it is more user-friendly now, with information that will be useful to practitioners.

As the editorial team you may want to look at the language and odd spelling mistake, but otherwise the paper is now satisfactory.

-----------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-----------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-----------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)
