Reviewer's report

Title: Estimation of Progression of Multi-state Chronic Disease Using the Markov Model and Prevalence Pool Concept

Version: 3 Date: 16 November 2006

Reviewer: Paul Albert

Reviewer's report:

General
I have no comments other than the paper is acceptable and that the authors addressed my initial concerns.

-----------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-----------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-----------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)
