Reviewer's report

Title: Prospective, randomized evaluation of a personal digital assistant-based research tool in the emergency department

Version: 2 Date: 15 October 2007

Reviewer: Ronald C. C Merrell

Reviewer's report:

I read the MS resubmission and the response to my critique. I initially had four concerns. Concerns # 1 and 4 were nicely answered in the letter but there was no change in the MS. I suggest the nice response find its way into the MS. I generally raise points because I suspect the general reader may have the same question. I believe the MS should be published but hope there will be a way to put the response to my questions 1 and 4 into the text.
