Reviewer’s report

Title: Survey of information technology in Intensive Care Units in Ontario, Canada

Version: 2 Date: 2 November 2007

Reviewer: Alan Morris

Reviewer’s report:

General:
This is an informative presentation of physician perceived use of computers in ICUs in Ontario, Canada. The authors contribute to the literature regarding the perceived use of computer systems and the system variation that impedes interoperability and data transfer.

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
None

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
None

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)
More discussion of the limitations of the self reported survey and the exclusive use of physicians would enhance this report.

What next?: Accept after discretionary revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
