Reviewer's report

Title: An interdisciplinary team communication framework and its application to healthcare 'e-teams' systems design

Version: 1 Date: 2 March 2009

Reviewer: Christian Nohr

Reviewer's report:

It is a very well written manuscript. The research questions addressed are of high importance to the research in the field. They are well defined and the methods applied are well chosen, original, appropriate, and well described. The data material are original, rich, and sound. The discussion is very interesting for the field, and the conclusions are adequately supported by the data. The manuscript clearly reference the sources of the work, and it covers the most important references of the field.

My recommendation is to accept the manuscript for publication without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
