Reviewer's report

Title: An interdisciplinary team communication framework and its application to healthcare 'e-teams' systems design

Version: 2 Date: 1 June 2009

Reviewer: Martin Dawes

Reviewer's report:

The authors have addressed all the comments wither with changes to the text or with a reasoned discussion. The revised article deals with many important aspects of interdisciplinary working and HIS and provides some clear directions for further work. As such it is important and relevant to health service researchers and health organisers.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
