Reviewer's report

Title: Mothers' Experiences in the Nurse-Family Partnership Program: A Qualitative Case Study

Version: 3 Date: 12 July 2012

Reviewer: Lynn Kemp

Reviewer's report:

Major Compulsory Revisions
The major issues with the paper have been addressed by the authors.

Minor Essential Revisions
The number of mothers participating in the second interview and those that didn't and the reasons why they didn't do not add up to the correct number of participants on page 10. On page 27 the numbers appear correct.

The authors should be encouraged to use a consistent style for presentation of quotes to assist readability. In particular, on page 21 there are very long quotes included in the text (though quotes of similar length are indented elsewhere in the paper).

Discretionary Revisions
At times the discussion appears somewhat repetitive. The authors should be encouraged to 'tighten' the writing where possible.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
