Reviewer's report

Title: Nurse anaesthetists- and OR nurses` adherence to WHO's Surgical Safety Checklist -a grounded theory study

Version: 6 Date: 27 July 2012

Reviewer: Brigid Gillespie

Reviewer's report:

For the most part, the authors have addressed the comments and suggestions of the two reviewers, and have justified their used of methods.

1. There are some typos and minor grammatical errors

2. The authors need to make explicit in the discussion section that these are the views of the nurses and that, while the study focused on the nurses’ experiences, these comments may be interpreted as being somewhat biased because of the lack of medical representation. This needs to be acknowledged in the limitations.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
