Title: Iranian Cancer Patients' Perception of Spirituality: A Qualitative Content Analysis study

Version: 1 Date: 15 January 2012

Reviewer: Lois Ramondetta

Reviewer's report:

Minor essential revisions-this is an interesting qualitative study with many grammatical mistakes. Even the results in the abstract could be a little clearer. Editing needed in introduction.
The intro is also too long
Under Rigor-who are the external supervisors
Under ethical consideration -what University is noted

Major revision-you should discuss Puchalski consensus where you reference bib 6/8
