Reviewer's report

Title: Unsafe clinical practices as perceived by final year baccalaureate nursing students: Q methodology

Version: 1 Date: 2 August 2012

Reviewer: Noori Akhtar-Danesh

Reviewer's report:

This manuscript reports on a well-conducted study. The manuscript itself is well-written. My comments for improving the manuscript are provided below.

Major Essential Revisions:

1- In tables 1-3 and 5-7, please include rankings for all three factors (for each site), the same way reported in tables 4 and 8 (without the “Average Ranking” column).

2- The Discussion is lacking a proper comparison between factors (viewpoints) for Site A and Site B. One would like to know to what degree the viewpoints from these sites are similar or different and why.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests: 

I declare that I have no competing interests.
